

AVIC-HD3-II - Application Update Instructions

Please load the CD-R which contains the Firmware update into your unit. The system will automatically start the update processes in 1 minute.

WARNING! While your navigation system is being updated, do NOT turn off the power to the navigation system. Severe damage to your navigation system could result from your failure to obey this warning, including but not limited to the loss of all content/data that is stored on the Hard Disc Drive (such as song files ripped from CDs as well as address book entries and other user information).

If your system does not reboot and start update process, then please check your system and CD-R as follows:

1. Check your system version and confirm that the update file that you have downloaded is the correct version for your unit.
2. Check your CD-R/-RW and confirm that the CD-R is burned with correct format.

Update Process:

Please wait about a few (7~10) minutes to complete all updates in the system. The system will automatically reboot after update process is completed.

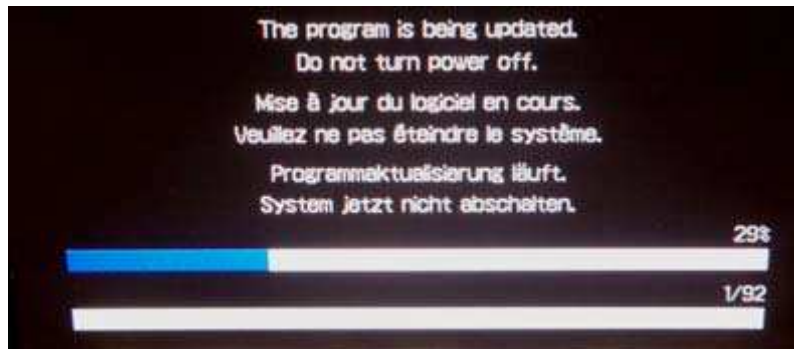

1. Checking the CD-R update disc

2. Update started

3. Updating the Firmware

4. Update completed and the system will now automatically reboot

Confirm the update was successful:

Please follow these steps below to confirm the update process succeeded.

- ✓ Press the "Menu" key on the unit
- ✓ Press the "Settings" button
- ✓ Press the "Hardware" button
- ✓ Press the "Service Info Screen" button

- ✓ Press and hold for a few seconds the upper left corner of the "Service Information" screen
- ✓ Check the "HDD Application Version"

The upgrade was successful if the "HDD Application Version" has become 3.100.400. Your unit is now completely up to date and you can eject the CD-R from your system.
