

Pioneer AVIC-3210BT in Seat cars

The shape of an OEM radio in a Seat is different from the shape of Seat OEM Navigation.

To install the AVIC-F3210BT the frame of a car equipped with the OEM Navigation is needed.

Please use the following Seat spareparts:

Seat Leon	1P1 858 071 A	47V
Seat Altea	5P1 858 071 B	1MM
Seat Altea XL	5P1 858 071 B	1MM

The bold marked digits are the "colour variances" these variances are different in the car.
The right "colour variance" can be found on the first page of the car's service book.

Pioneer AVIC-3210BT in Seat cars

To install the AVIC-F3210BT in the Seat car, a modification inside the dashboard is necessary. The redmarked parts on picture 2 needs to be removed. Please make sure to fix the greenmarked screws here when the modification is done.

The estimated time is around 15-20 minutes.

After this modification AVIC-F3210BT fits perfect into the mentioned Seat cars.
